SUMMARY

I am a final year student at Nanyang Polytechnic with a diploma in Business Informatics seeking to leverage my technical and professional expertise to grow professionally as a developer. Knowledgeable in both front-end and back-end technologies. Able to perform wireframing to production.

EXPERIENCE

Classification Automation (internship)

Jul. 2020 - Sept. 2020

- Helped to discover and eliminate problems by gathering requirements and implementing process automation for Nanyang Polytechnic i@Central.
- Created a program that categorises with machine learning and sorts email with automation.
- Developed using UiPath, Python and various data science libraries.

PROJECTS

Nanyang Polytechnic

Full Stack Development

Mar. 2020 - May. 2020

- Because of the pandemic, the school has arranged for me a final year project as my internship
- Created and maintained a web application with both back-end and front-end technologies.
- Developed a chatbot and Learning Management System (LMS) with full content management system.
- Developed using Python, framework and various libraries.

Covid Analysis (<https://github.com/Tjandra-Putra/airline-industry-analysis>)

Feb. 2020 (1 month)

- Researched, documented and performed data analysis.
- Performed data analysis on the performance of airline industry due to global pandemic.
- Developed using Python and various data science libraries.

Linkvine (<https://linkvine.herokuapp.com/>)

Feb. 2020 (1 month)

- Developed web application that allows you to create a personalised and easily-customizable page, that houses all the important links you want to share with your audience. It can be used on social platforms.
- Developed using Python, frameworks and various libraries.
